

Core

Deadline: Sunday of Week 2

Difficulty Level: Intermediate

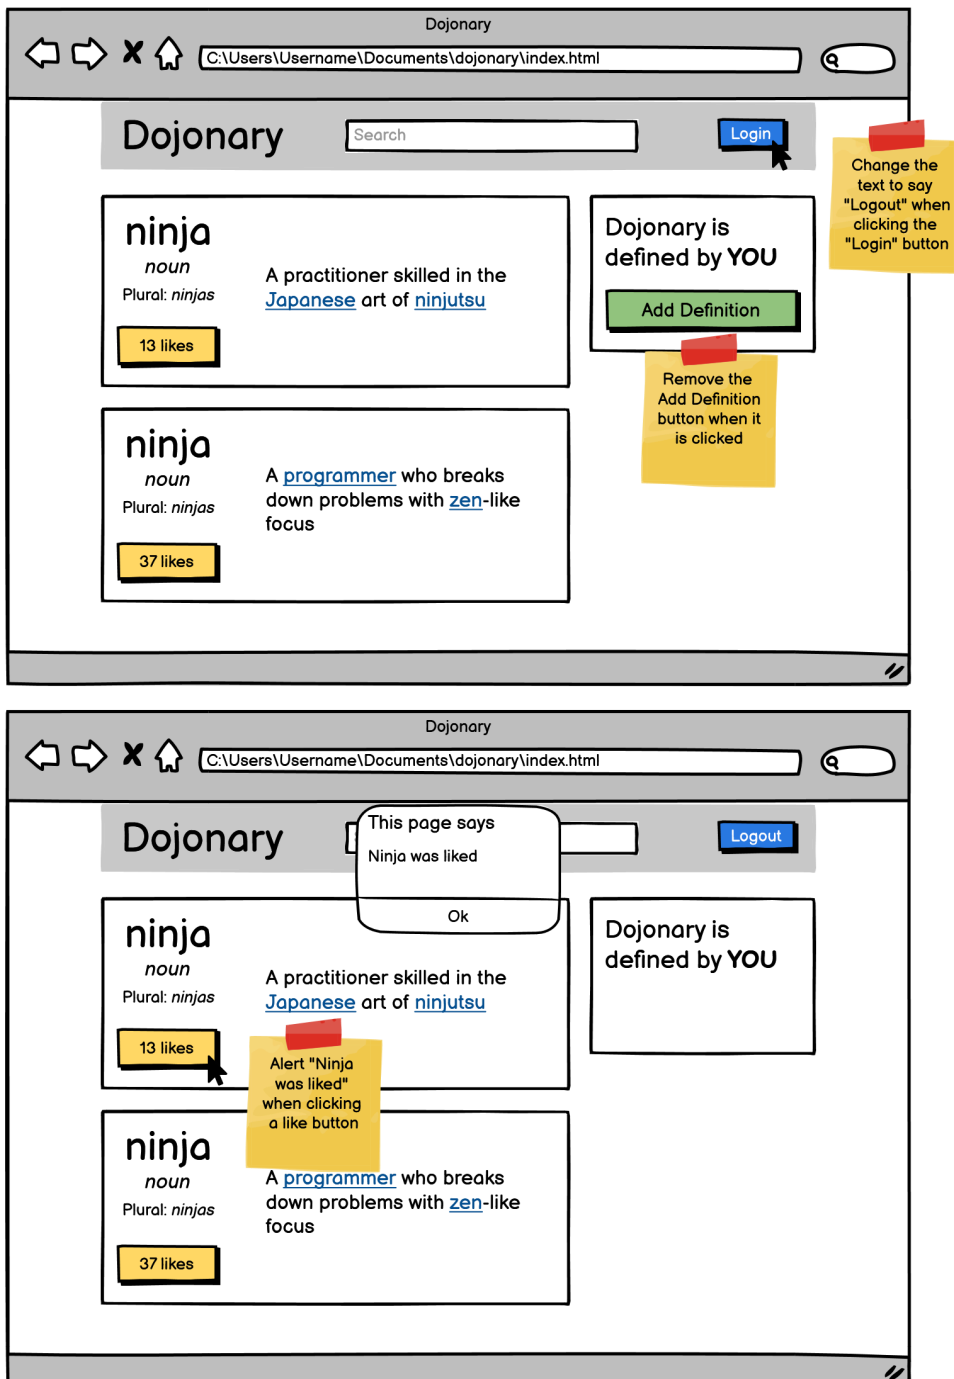

Est. Time: 1.5 hours

Button Clicker

Objectives

- Practice using the `onclick` event
- Combine what we've learned of **HTML**, **CSS** and **JS**

Recreate the layout you see below. It may be helpful to focus on getting the **HTML** and **CSS** completed before adding the **JS** functionality to the page.

When you've turned in your solution, navigate over to your "assignment checklist" tab to check out the green check mark - you're one assignment closer to graduation!

Help, I'm Stuck!		
I've struggled for <20 minutes.	I've struggled for <40 minutes.	I've struggled for >40 minutes.
<ul style="list-style-type: none">• Re-read the previous modules for extra clarity.• Search for specific help on Google, such as "making <p> tags in italics."	<ul style="list-style-type: none">• Post in your cohort's Discord channel so your classmates can help!	<ul style="list-style-type: none">• Tag a TA or instructor on Discord.• Schedule a code review.

- ☐ Visually recreate the wireframe as shown above
- ☐ Change "logout" text to say "login" on click
- ☐ Remove the "Add definition" button when clicked
- ☐ Alert "Ninja was liked" when clicking a like button
