

Core

Deadline: Sunday of Week 1

Difficulty Level: Basic

Est. Time: 1 hour

GitHub Blocks

Objectives

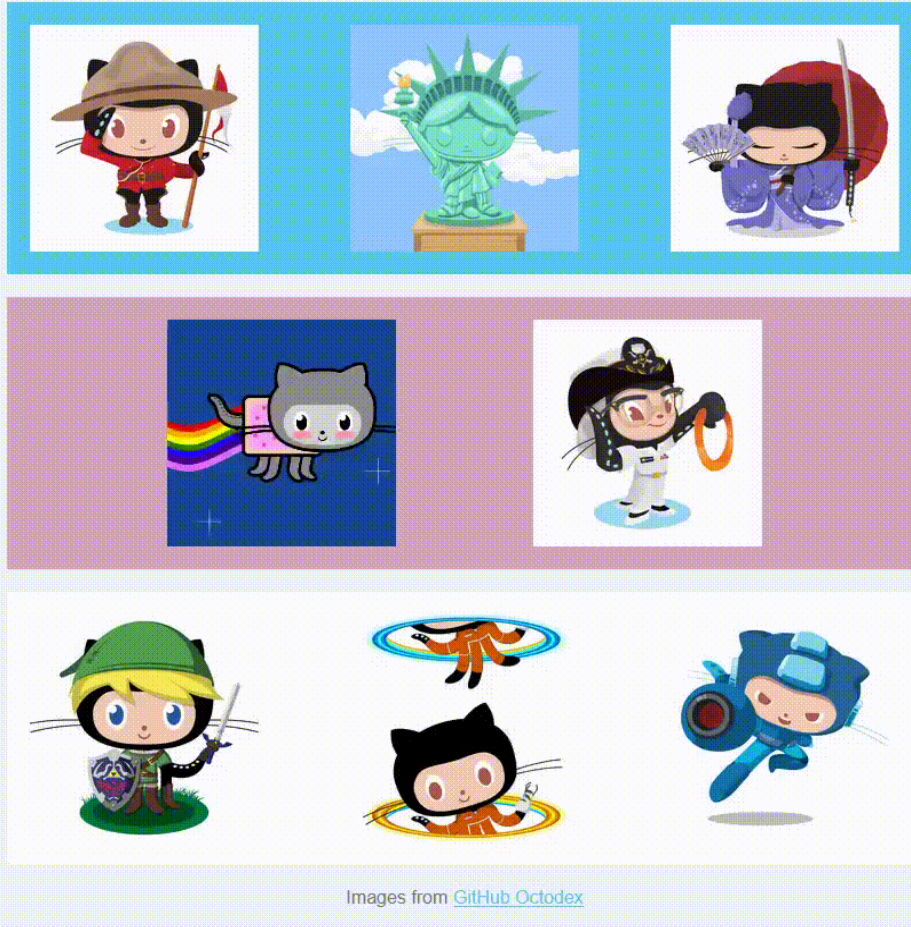

- Practice using the [Box Model](#) properties: `padding` , `border` , and `margin` .
- Practice what we've learned about `Flexbox`
- Practice using different values of `justify-content` .

Use `margin` and `padding` to adjust the spaces between the rows and use `flexbox` properties to be able to put each image in its proper place. Set the images to all have a uniform size.

```
img.octocat {  
  height: 200px;  
}
```

Pick your favorite colors and your favorite images from [the Octodex](#) to recreate the layout you see below.
